ProLogic OTC – "One Time Code" Safe Lock

The ProLogic OTC has been designed specifically for ATM Security Management. This centrally managed safe lock system, uses next generation connectivity to provide real-time "One Time Codes", Close Seals, automated dispatch, and secure portfolio management.
Simple to Use. Reliable. Secure.

- ProLogic OTC software system makes managing ATM portfolios easy.
- Simply register your safe locks, assign access rights to personnel and establish your operational schedule.
- The ProLogic OTC is a connected ATM safe management system that does not reside on the Financial Institution's or ATM network.
- The ProLogic OTC system has been designed with flexibility in mind, select the connectivity and authentication mode that is right for your business using either our Smartphone APP or PDA/Scanner APP.
- One Time Codes are delivered in real-time from automated Dispatch Software directly to your APP. Then the code is sent by Bluetooth directly to the safe lock.
- Close Seals are automatically transmitted to central dispatch upon task completion ensuring maximum security. You will know in real-time that your ATMs are secure.
- Shared Access is achieved seamlessly and effortlessly with a simple mouse click, without the need to "shelve" locks. (You will never "shelve" another lock again.)
- ProLogic OTC software allows you to maintain complete control over your ATM portfolio including shared access partners. Eliminate or add a shared access partner instantly and easily.
- Real-time audit trail is transmitted to the central dispatch after each opening
- No cellular signal …no problem. The ProLogic OTC software has built-in redundancy with both real-time and pre-issued codes settings.
- No more iButtons, tokens or Dallas keys, the ProLogic OTC uses Bluetooth electronic authentication
- Real-time communication means your ATM assets are secure and your operation is on-track
